LETTER OF RECOMMENDATION

To whom it may concern:

Please find this letter of reference and recommendation for Surveillance Analytics for the selection of Security Doors/Windows and Ballistic Glass services. Briargrove Elementary located in Houston, Texas has recently undergone the selection and process of implementing an enhanced security infrastructure including security film and ballistic glass for doors/windows for the school campus.

My background has been around global security and health assessments with Fortune 2000 companies, NGO's and Government Entities and I understand the importance of "hardening" environments. I currently lead the Briargrove PTO Safety Committee. Funding for this project was provided from private donations through Briargrove's PTO, so we needed an experienced supplier that could execute and deliver around the student's schedule.

As part of the selection process, we solicited proposals from three capable suppliers for these services and reviewed each supplier around experience, underlining technology, ability to install to a tight schedule and finally costs. After a thorough review with each supplier our experience with Surveillance Analytics and Alan Morris stood out as the best supplier and choice to move forward with our project. What stood out above all vendors was Surveillance Analytics flexibility and willingness to work with Briargrove by providing thought leadership and bringing their installation team out to the campus for a walkthrough of the work to be provided to ensure that all the scope was understood. This included a thorough review of what their understanding of the scope of work to be completed and most importantly identified any areas that may have been missed or concerns with recommendations of what would make the implementation more viable.

We could not have been more pleased with our selection, Alan and his team were extremely knowledgeable and responsive to implement our solution. We would definitely use Alan Morris with Surveillance Analytics again without hesitation and can recommend them to those who are considering their services.

If I can be of further assistance, please feel free to contact me directly.

Regards,

Robert Wade
